

**MULTICOVER 9503 FILM DISPENSER**  
SAVE TIME WITH SAFETY

Your shrink-wrapping station can also be optimised by making it easier to handle your shrink-wrap. The Multicover 9503 dispenser is the ideal accessory for ensuring your pre-cut covers, and rolls of film or tubing are ready to use in your production area.

The Multicover 9503 dispenser allows you to use two types or formats of film or tubing interchangeably, without tedious handling or wasting time. It allows you to set up your rolls of film so they can be easily unwound.

On castors, it can be easily moved around to add new rolls of film or shrink-wrap in another area of the warehouse.

The simplicity of its installation and use makes it possible to have rolls of films stored and at hand. It can be used by itself or in conjunction with the Multicover 940, 950 and 960 sealers, which together make it possible to use three different rolls.
