

GUSSETED HEAT SHRINK TUBING

THE ESSENTIAL CONSUMABLE FOR INDUSTRIAL PACKAGING

Gusseted tubing is an indispensable consumable for manufacturers producing pallets of various heights. Manufacturers often choose based on the pre-cut covers available, but for pallets of different heights, you need to cut them, which can waste time and consumables.

With two sizes of tubing available (100 x 120 and 80 x 120), it will meet the vast majority of your needs. Then all you need is a Multicover sealer, which is available in both manual and electric versions.

In just a few seconds, you can make a suitable cover for your load by creating a seal at the required height. Therefore, gusseted tubing is suitable for trading companies, distributors and manufacturers who ship different orders for each client.

TECHNICAL TABLE

Item code	80x120 : HSS.80x120x125C
	100x120 : HSS.100x120x125C
Pallet dimensions	2,62 x 3,94 ft - 80 x 120 cm
	3,28 x 3,94 ft - 100 x 120 cm
Length	360,9 or 298,6 ft - 110 or 91 m
Thickness	125 microns

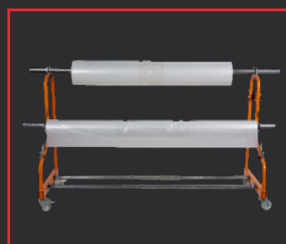

EQUIPMENT SOLD SEPARATELY

RIPACK 3000

MULTICOVER 960

MULTICOVER DISPENSER
